Winter with sherpa

RIJS TEXTILES
rijstextiles.com

Free pattern · sofa throw, neck warmer and hot water bottle cover · level: beginner

You will need

Sherpa (cotton fleece), 150 cm wide	2.2 m for the throw, 0.5 m for neck warmer + hot water bottle cover
Teddy fabric for a double-layer throw	2 m
Or: 30 mm bias binding for a single-layer throw	7 m
Polyester sewing thread and a stretch or jersey (ballpoint) needle (size 90)	
Pins or clips, ruler and chalk	

Wash the sherpa at 30 to 40 degrees before cutting: cotton may shrink slightly, teddy doesn't. Seam allowance: 1 cm, stitch length 3 to 3.5 mm. Don't pull the fabric, as sherpa stretches.

Throw

approx. 150 × 200 cm · 1 to 1.5 hours

1. Cut sherpa and teddy to 150 × 200 cm. Round off each corner with the corner template (page 2).
2. Right sides together, teddy pile facing in, pin every 10 cm.
3. Sew all round at 1 cm. Leave 30 cm open on one long side.
4. Turn, push out the curves and topstitch all round at 2.5 cm. This also closes the opening.

Single-layer throw: round off the corners and sew 30 mm bias binding around the edge.

Neck warmer

60 × 50 cm · 20 minutes

1. Cut a rectangle of 60 × 50 cm.
2. Right sides together, sew the short edges together: a tube.
3. Turn and tuck the bottom half inside: a double tube of 25 cm.
4. Sew the raw edges together with a zigzag.

Hot water bottle cover

made to fit your bottle · 45 minutes

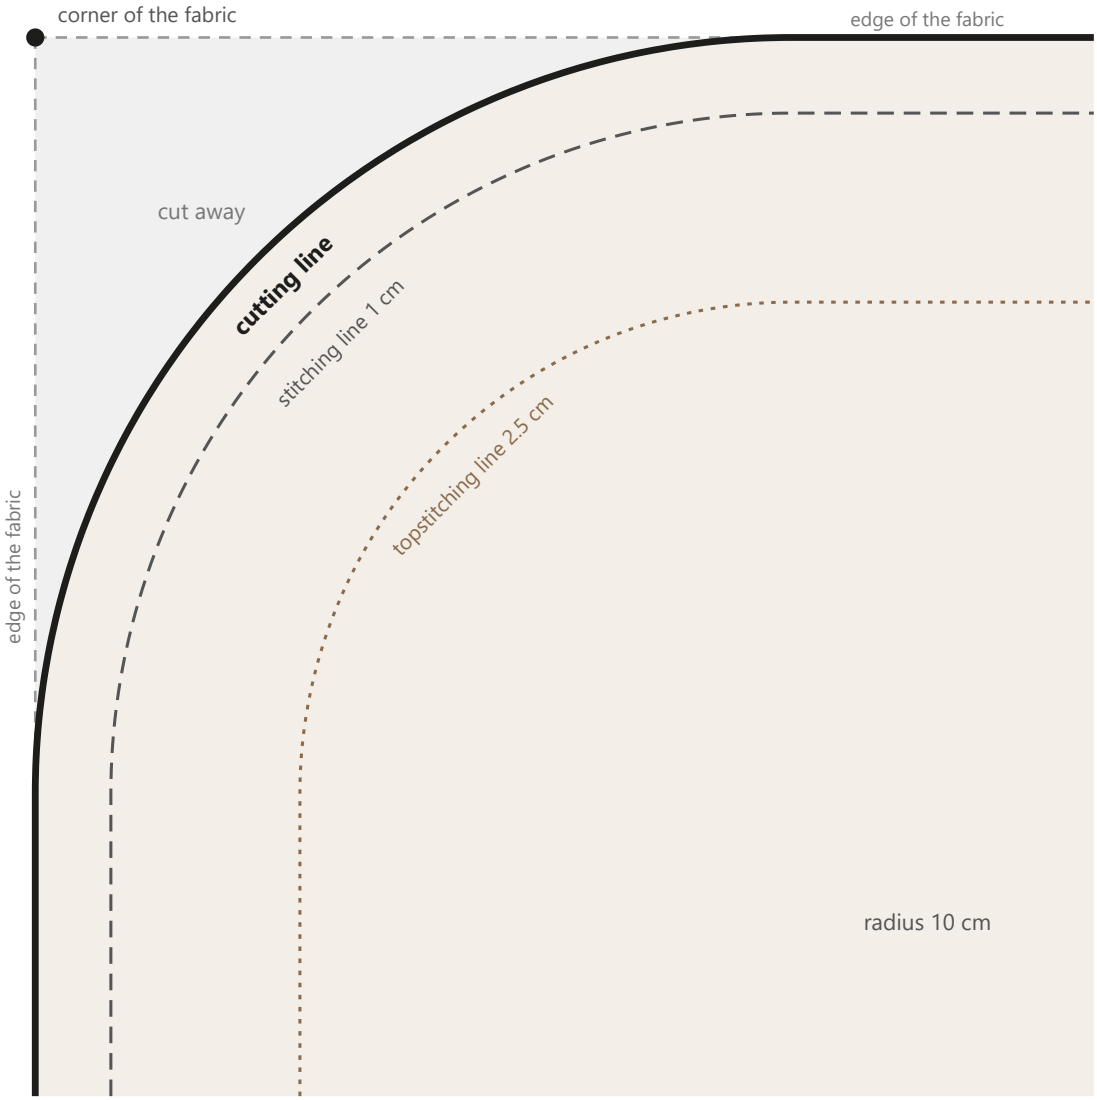

1. Trace your hot water bottle on paper and add 3 cm all round.
2. Cut the front 1×.
3. Cut the pattern across at half height and add 5 cm to each half: the two back pieces.
4. Fold the cut edges of the back pieces over 2 cm and stitch.
5. Front right side up, then both back pieces right side down (6 cm overlap). Sew all round, leave the neck open, turn.

Printing

Print page 2 at 100% (not "fit to page") and measure the test square: exactly 3 × 3 cm.

Full-size corner template

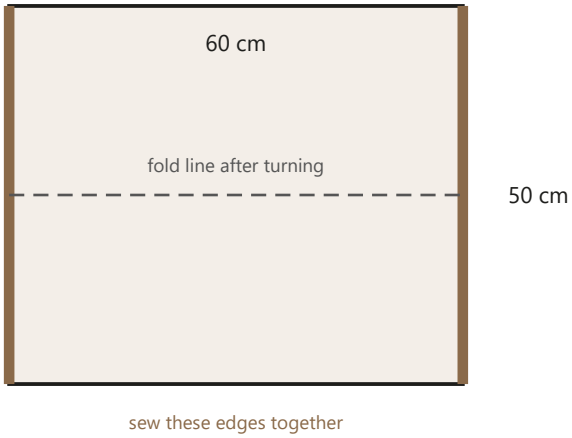

Place the corner of the template exactly on the corner of your fabric and cut along the thick curve. Use the same template for all four corners and for both layers.
